

IT'S THE END RESULT THAT COUNTS | PART 1

Our sows nurse their own piglets and save more pens for farrowing to increase your output at the end

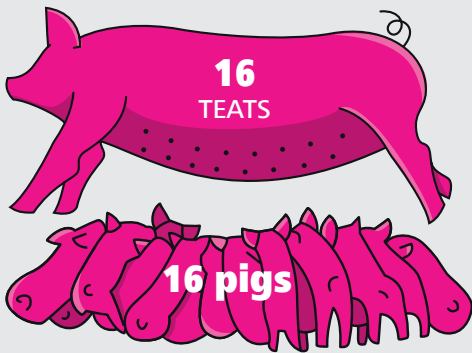

TN70

Sow with **high** mothering ability

200

FARROWING PENS

21 DAYS WEAN AGE
13 ROUNDS/YEAR

TO BE WEANED

0 PIGLETS
TO BE CROSS
FOSTERED:

200

PENS FOR FARROWINGS SOWS

208 PIGS WEANED PER FARROWING PEN

TOTAL ANNUAL OUTPUT

 **41,600** market hogs

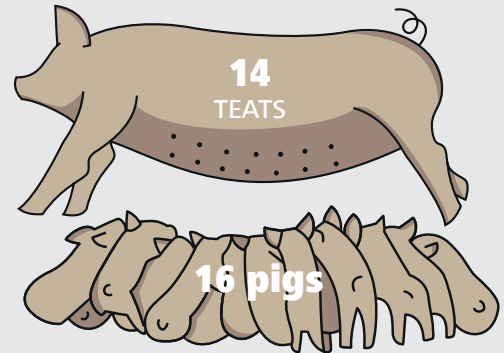

Sow X

Sow with **low** mothering ability

200

FARROWING PENS

21 DAYS WEAN AGE
13 ROUNDS/YEAR

TO BE WEANED

2 PIGLETS
TO BE CROSS
FOSTERED:

175

PENS FOR FARROWINGS SOWS

182 PIGS WEANED PER FARROWING PEN

TOTAL ANNUAL OUTPUT

 **36,400** market hogs

Disclaimer
This infographic is meant to illustrate the effect of mothering ability on output and is not based on actual farm results.

Total output: #farrowing sows * #pigs weaned * #rounds
Assumption: 0% preweaning mortality

Model calculations are done using Topigs Norsvin modelling software.
